Update on other One Health Activities in the Arctic

Tom Hennessy, MD, MPH
CDC Arctic Investigations Program
Anchorage

tbh0@cdc.gov, 907 729 3400
3 Topics

• Arctic Council
• International Union for Circumpolar Health
• Interagency Arctic Research Policy Committee (IARPC)
1. Arctic Council Initiative

• Promote a “One Health” Approach in Arctic Health

• Objectives

• Develop a strategy for a “One Health” approach to address climate-related changes to human health in the Circumpolar Arctic

• Enhance a circumpolar network of One Health stakeholders.

• Coordinated by the Arctic Human Health Experts Group
Health Concerns Where a One Health Approach could be used:

- Animal-to-Human Infectious Diseases.
- Environmental Contaminants, Wildlife health and Subsistence foods.
One Health Activities

- One Health Session at International Congress on Circumpolar Health
  - Oulu, Finland  June 9, 2015
- Manuscript: “The Arctic – A One Health Imperative”
  - Bruce Ruscio, Josh Glasser  US Dept of State
  - Mike Brubaker, Will Hueston, Tom Hennessy
- International J of Circumpolar Health
1. Identify cross-sectoral networks

2. Stakeholder interviews

3. Define the system through process mapping

4. Analyze the system through multi-agency workshops

5. Identify opportunities to strengthen system operations

Develop implementation plan

Figure 1. Adapted from One Health Systems Mapping and Analysis Resource Tool Kit
One Health Activities

• One Health Session at International Congress on Circumpolar Health
  • Oulu, Finland   June 9, 2015
• Manuscript: “The Arctic – A One Health Imperative”
  • Bruce Ruscio, Josh Glasser       US Dept of State
  • Mike Brubaker, Will Hueston, Tom Hennessy
  • International J of Circumpolar Health

• One Health Workgroup Meeting
  • October 20, 2015
    • In association with Senior Arctic Officials meeting
  • Denaina Center
One Health Next Steps, Options

- Collect information about existing One Health programs and projects
  - Use for education, advertisement in Arctic populations
  - Catalog of activities
  - Compare results, share best practices
- Analysis of One Health activities in Arctic
  - “Mapping” intersectoral networks and stakeholders
  - Identify ways to strengthen systems
- Create, endorse or fund a new project or projects
  - Collaboration with AMAP, IUCH or other partner?
2. International Union for Circumpolar Health

• Links national or regional circumpolar health groups
• Multi-disciplinary, wide range of topics
• Activities
  • National orgs: American Society for Circumpolar Health
  • Int’l Congress every 3 years
    • Next Copenhagen, 2018
  • International Journal for Circumpolar Health
  • Networks and working groups
    • Infectious Diseases WG
IUCH Infectious Disease WG

• Surveillance and research groups
  • Intl Circumpolar Surveillance, Viral Hepatitis, H. pylori, TB,

• Climate Change and Infectious Diseases
  • 2 Regional Meetings
  • Fairbanks, 2010
    • *Zoonotic infections in Alaska: disease prevalence, potential impact of climate change and recommended actions for earlier disease detection, research, prevention and control*
    • K. Hueffer, et al., IJCH 2013, 72: 19562
  • Copenhagen. Sept 2011
    • *Climate change and infectious diseases in the Arctic: establishment of a circumpolar working group,*
      • Parkinson, et al., IJCH, 2014, 73:25163
Climate and Infectious Diseases WG

• Next project: Compare surveillance for climate-sensitive zoonoses across Arctic region
  • Survey of diseases notifiable to public health
    • Human and animal
  • Summarize data and trends
    • Compare and contrast
    • Best practices
    • Report for publication
3. IARPC Human Health Team

• Interagency Arctic Research Policy Committee
• Arctic Research Plan
  • Human Health
  • Continue and expand circumpolar surveillance of and research on infectious and non-communicable diseases, trauma, and injuries
  • Continue interagency collaboration to monitor the impacts of climate change and environmental contaminants on human health
  • Continue to support investigator-initiated research in major health-priority areas
  • Continue to engage indigenous communities and tribal groups in research activities and projects in the Arctic

Events that may interest you

View past events (30)

TODAY
Aug 23-25
The Alaskan Arctic: A Summit on Shipping and Ports
I will attend

TODAY
Aug 24
One Health Group Quarterly Meeting / Meeting of the Human Health CT
3-5 pm Alaskan Daylight Time
I will attend

Aug 26
IARPC Collaborations Website Tutorial for Association of Polar Early Career Scientists (APECS) Members
11 am–12 pm Alaskan Daylight Time
I will attend

Schedule event

...and include related agenda, presenter bios, documents, links, phone and web connection info, and more. After the event you can post the minutes.

</table>
3.7.2

3.7.2.a Conduct community health assessments and initiate training and deployment of monitoring technology. Develop a web-based monitoring network and village adaptation strategies, and establish the monitoring database. Conduct statistical analysis of laboratory specimens and share data with agencies and jurisdictions. Provide feedback to tribal leaders and tribes and tribal organizations. Continue planning with interested agencies to develop support for ongoing monitoring and extension to interested communities in Alaska. Disseminate program results to other circumpolar communities and affected communities in the lower 48 states (IHS; EPA, DOI FY2015)

3.7.2.b Develop, deploy, and assess a surveillance and response Toolkit for Alaska to promote community based adaptation planning for climate change. Deliverables will include training protocols, a web portal, a surveillance dataset organized by region, adaptation and mitigation recommendations, and reports/manuscripts for peer-reviewed publication

3.7.2.c Recruit a cohort of 200 Alaska Native women for collection of blood samples, patient interview, and medical-chart information. Collect and chemically analyze salmon tissue samples

3.7.2.d Conduct surveillance evaluations and sero-prevalence studies on humans and wildlife for potentially climate-sensitive infectious diseases such as those caused by brucellosis, trichinellosis, toxoplasmosis, franciselliosis, giardiasis, and cryptosporidiosis

3.7.2.e Implement a NOAA-CDC memorandum of agreement for environmental and public health impacts providing exchange of scientific expertise and resources in the areas of climate, weather, water, and environmental, oceanographic, and atmospheric health as it relates to public health
