Achieving Excellence:
We achieve excellence through actions that support the ANTHC Mission, and which demonstrate:

- Consistency.
- The commitment of our leaders and all staff to our values.
- Responsibility to the organization, our coworkers and our customers.
- Collaboration with our colleagues.
- Accountability for our actions.
- Careful stewardship of the organization’s resources.
- Quality in everything we do.
- Continuous learning and improvement throughout the organization.

MISSION: Providing the highest quality health services in partnership with our people and the Alaska Tribal Health System.

VISION: ALASKA NATIVES ARE THE HEALTHIEST PEOPLE IN THE WORLD
We provide consultative services to the Alaska Tribal Health System in the areas of:

RADATION PROTECTION       INDUSTRIAL HYGIENE       SAFETY       INFECTION CONTROL

These services allow our partners to maintain safe and healthy facilities which are essential to providing the highest quality health services.

In one visit, our radiation protection surveys meet regulatory requirements for both medical and dental x-ray systems in the State of Alaska. More importantly, our surveys evaluate patient radiation dose exposures, which is an expectation of most accrediting agencies.

We maintain calibrated equipment available to respond to chemical, biological, radiological, and indoor air concerns.

Additional IEH information can be found at:
http://www.anthc.org/ieh/

In a single visit we offer comprehensive services by professionals with health care-specific graduate level training and expertise.

100% customer satisfaction rating reported by an independent survey company!

We are able to respond to your concerns with customized solutions!

Accreditation
Health care-specific accreditation has become the industry standard and our office can assist your organization with becoming accredited or complying with accreditation standards.

Radiation Protection
In one visit, our radiation protection surveys meet regulatory requirements for both medical and dental x-ray systems in the State of Alaska. More importantly, our surveys evaluate patient radiation dose exposures, which is an expectation of most accrediting agencies.

Industrial Hygiene
Our Certified Industrial Hygienists offer professional services devoted to the science and art of anticipating, recognizing, evaluating, controlling, and preventing hazards. Commonly in healthcare, radiological, chemical and biological exposures are in question and require professional evaluation.

Safety & Infection Control
We are committed to protecting the health and safety of those in the workplace and as part of that commitment we offer the following:

- Assessment of the physical environment, including Life Safety Code and OSHA compliance.
- Program review and support for Environment of Care, Emergency Management, Life Safety, and Infection Control.
- Respiratory protection training and education.

Commonly in healthcare, radiological, chemical and biological exposures are in question and require professional evaluation.

ALIGNED SERVICES
In a single visit we offer comprehensive services by professionals with health care-specific graduate level training and expertise.
