COVID-19 Testing Upon Admission To Labor and Delivery

**Purpose:** To give guidance on Universal COVID-19 Testing and associated precautions

**Update 11/19/30**

If rapid testing supply is reduced, then the COVID-19 (In House) PCR order will be used for routine screening of patients admitted to the hospital that are not suspected to have COVID-19.

**COVID-19 Positive Management:**

*Intrapartum:* Contact/droplet with mask, eye protection, face shield, gown, and gloves. Use labor room 4 if available.

*Vaginal Delivery:* Airborne N95 mask, eye protection, face shield, gown and gloves.

*Cesarean Delivery*

Airborne N95 mask, face shield, and gown.

Use C/S ROOM A and HEPA filter.
Outpatient COVID-19 Testing Prior to Planned Admission for Anticipated Procedure
