AI/AN-Focused Radio Interviews, Soundbites, and Facebook Live with Dr. Anthony Fauci

Interviews:

- [Preparing for the Next Pandemic](#), *Native America Calling*, March 1, 2021: Dr. Fauci's interview can be heard at 20:00-28:45 and he covers how to prepare for the next pandemic, vaccine safety, new variants, and public health safety measures.
- [KGUA's Peggy Berryhill Talks with Dr. Anthony Fauci](#), KGUA Public Radio Zoom Interview, March 1, 2021: Dr. Fauci's interview can be heard at 00:00-10:30 and he covers how American Indians have been disproportionately affected by COVID-19, vaccines (and answers, "Does it matter which vaccine you get?"), and public health safety measures after receiving a vaccine.
- White Mountain Apache Tribe Chairwoman Gwendena Lee-Gatewood Interviews Dr. Fauci, KNNB FM, March 23, 2021:
 - [KNNB FM broadcast](#)
 - Message to Elders (37:14-40:05): Importance of vaccination
 - About variants (40:08-41:53): Status, effectiveness of current vaccines, and how best way to stop variants is to get vaccinated and follow public health measures
 - [Chairwoman Gatewood's Saturday Facebook Live Show](#) (Additional clip from KNNB FM)
 - Message to parents (2:24-3:57): Importance of children being in school and following CDC guidelines

Selected Audio Soundbites with Transcripts:

- **Soundbite #1, March 23, 2021:** <https://f.io/t38rZDDf>

"Let me speak directly to your Elders and tell them that it is very important for them to get vaccinated when the vaccine becomes available. First of all, the vaccine is highly efficacious and it is shown to be quite safe. Number two, that since you are an Elder you already are in a group that has a greater likelihood if you do get infected that you will have a serious outcome that could put you in the hospital and possibly even kill you. In addition, because you are elder, the chances are that you have an underlying condition such as diabetes, heart disease, lung disease, hypertension, kidney disease, that if you got infected you could have a severe outcome of COVID-19. So I'm asking you, for your own good and for those who love you, get vaccinated. It could be lifesaving to you as well as helping to make sure that this pandemic does not spread throughout your community."
- **Soundbite #3, March 4, 2021:** <https://f.io/GysrPHtJ>

"It's so important to get vaccines to the Native American population and when the vaccine becomes available to get as many of your individuals in the Tribal Nation vaccinated as you possibly can, as quickly as you can because it's a highly efficacious, and very safe vaccine. So I just wanted to get the opportunity to tell people in the Native American community why it's so important for their own health, for that of their family, and for that of their community to get vaccinated when vaccines become available."

- **Soundbite #4, March 4, 2021:** <https://f.io/shYUblzz>
 “The community spirit among the Tribal Nations is such that when you have something that you realize is important for your health, for that of your family, and for that of your community – I know it’s a close knit community – so perhaps that’s one of the reasons why when something as life-saving as a vaccine comes along, the uptake of it is very smooth and very efficient, so in that respect I think the rest of the country might learn a lesson from how things have gone with the Tribal Nations.”

NIH Facebook Livestream Recording:

- NIH National Institute of Allergy and Infectious Diseases (NIAID) Director Dr. Anthony Fauci and Tribal Health Research Office (THRO) Director Dr. David Wilson address important questions surrounding COVID-19 research, clinical trials, and vaccines within American Indian and Alaska Native communities.
- [Watch on Facebook](#) | [Watch on YouTube](#) | Listen Only (Request Audio File from THRO)

Healthy Moments Interview with Dr. Anthony Fauci:

- *Healthy Moments* is a series of weekly radio episodes sponsored by the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), of the National Institutes of Health (NIH).
- In this episode, NIAID’s Dr. Anthony Fauci talks with NIDDK’s Dr. Griffin P. Rodgers to discuss the vaccine – why it’s safe, why you should consider getting vaccinated, and the importance of ongoing COVID-19 vaccine trials. [Listen here](#).
