You have completed ___ year(s) after treatment for HCV, now what?

Your follow up plan after cure:

___ If you had zero to minimal scarring in your liver there is no need for you to continue being seen in Liver Clinic.

___ If you had a FibroScan showing fatty liver follow up with your primary care provider who may refer you for another FibroScan in 3-5 years if there is concern that your liver has developed scarring/fibrosis.

___ If you had advanced scarring of the liver you should have a CBC and LFTs annually and an AFP drawn and RUQ US every 6 months. Due: ____/____.

You should be seen in Liver Clinic every 2 years. Due: _____.

___ If you had cirrhosis of the liver you should have a CBC, CMP, & PT/INR annually and an AFP drawn and RUQ US every 6 months. Due: ____/____.

You should be seen in Liver Clinic every year. Due: _____.

If you are coming to Anchorage, and need a FibroScan, call the Liver Clinic ahead of your visit to schedule. *****Remember not to eat or drink for 3 hours before the FibroScan*****

Tips to Keep Your Liver Healthy:

You are not immune to HCV. It is possible to become re-infected with the virus. To prevent re-infection, avoid all blood – this includes not sharing needles, razors, toothbrushes, or nail clippers. If you inject drugs use a syringe service program (such as 4A's, Interior Aids Assn. or iknowmine.org) to get free sterile needles, syringes and other supplies.

The HCV antibody test will remain positive after you are cured of HCV. This is your immune system remembering that you had the virus. The test to see if you have HCV after treatment is the **HCV RNA** test which will look for virus in your blood.

Get an annual HCV RNA blood test if you inject drugs or are male and have condom-less sex with other men.

Eat a balanced, healthy diet that includes lots of vegetables, fruit, fish, whole grains, and foods with healthy fats (olives, avocados, nuts, etc.). Drink plenty of water; avoid soda and juices.

Drink coffee. Up to 3 cups per day of black, decaf or regular, coffee has been associated with less liver scarring.

Do not drink alcohol or use drugs because these hurt the liver.

Exercise daily. Aim for 30-60 minutes a day.

Decrease stress in your life. Talk to people who are supportive.

Stop smoking. Ask for help if you need it. The Alaska Tobacco Quitline number is 1-800-QUIT-NOW (1-800-784-8669).
