

Options to Mitigate Erosion, Flooding, and Permafrost Degradation

Protection-in-place

The use of shoreline protection measures and other controls to prevent or minimize impacts.

Managed Retreat

Moving a portion of the community away from hazard prone areas to locations nearby or adjacent to the current site. In order to successfully retreat, a community needs developable land nearby.

Relocation

Moving the entire community to a new location that is not connected to the current site. Relocation is the option of last resort.
